Dear Viettel Careers Recruitment Team,

I am Vu Tuan Anh, currently a final-year student majoring in Software Engineering at FPT University. Viettel is a leading technology corporation that I have hoped for the opportunity to learn from and contribute to such an innovative organization. I believe that the Viettel Digital Talent program could be the first step in my journey of professional development.

During my studies, I have gained solid knowledge in programming, including languages such as Java, Javascript, and Kotlin, as well as frameworks like Spring Boot, ExpressJS and ReactJS. I have also experienced hands-on project during my OJT at FPT Automotive, working with Clean Architecture (MVVM).

I am highly committed and eager to contribute to the success of Viettel while learning from the best in the field. Thank you for considering my application, and I look forward to the opportunity to be part of your team.

Sincerely,

Vu Tuan Anh
